This sale will be broadcast live on the internet.

DVAuction
Broadcasting Real-Time Auctions
Real time bidding & proxy bidding available.

Live Broadcasting

The sale will be broadcast in real time on DV Auction. Ideal Video Productions has professionally videoed our sale offering. Those who cannot attend the sale will have the capabilities of bidding online throughout the sale.

On sale day the cattle will stay in their presale display pens and sell by video only. Please spend a little extra time going through the cattle prior to the sale, or visit with a member of our sales team so you can be familiar with potential purchases.

To watch or bid online, just complete the following steps:

1. At www.dvauction.com click on the "Create New Account" tab
2. Follow the instructions to set up a new account.
3. Click on "Apply for Bidding" **at least 24 hours prior to the sale**. DVAuction will contact you once you have been approved to bid. A buyer's number will not be provided until you have made a purchase.
4. After the sale, contact Cattle Brokers, Inc. to make arrangements for payment and transportation.

Please note: High speed internet access is required to be able to bid.

Proxy bidding: If you can't bid online, place a "proxy" bid through DVAuction. Follow the above steps and click the "Proxy Bidding" link under the sale listing. You can then place your maximum amount that you'd like to bid.

Assistance during the sale: Please contact DVAuction at 402-316-5460 if you experience any problems with the bidding process.

Retaining the “Keeper” Bull

Grassy Lake Cattle Company will select one bull from this sale offering to retain possession of and all breeding rights. At sale time, or soon thereafter, Grassy Lake may offer special and limited semen packages on the selected “Keeper” herd sire prospect. This selection will be announced the week of sale and noted in sale supplement information. Please contact Sale Team for any questions related to this item.

Breeding Soundness/Herd Health

Dr. Steve Schultz (979-218-8680) has done a stringent BSE on all bulls. These BSEs include an examination for physical soundness, scrotal integrity, and reproductive soundness. Also, each bull has passed a thorough evaluation for semen count, motility and quality. All bulls selling are considered as potential breeders and are guaranteed as breeding bulls through the first breeding season. If a problem should arise, please contact us and we will offer a replacement bull of equal or greater quality. If a replacement is not available when needed, a credit will be issued for our 2027 sale. All cattle have been inspected for health and fertility, are current with annual vaccinations, and come with interstate health papers. **All Twos and Coming Twos have been Trich tested.**

Breeding Interest Options on Bulls

Every bull will sell with 100% possession and natural service rights going to the buyer of said bull. Several bulls will sell with a noted breeding/semen interest retained by owner of given bull(s). The retained breeding rights and semen rights will only be important if given bull is taken for semen collection. In this case the retained ownership will have the rights to their proportionate share of semen and marketing rights. Each party will pay their proportionate share of collection and marketing costs.

For those bulls noted with a retained breeding/semen interest we will offer the new owner(s) an alternative option. The new owner(s) will buy 100% interest and 100% possession with the seller retaining the rights to 300 straws of semen at their costs of semen production for in-herd, commercial, or cooperator use only.

If original owner of bull would like semen and the buyer prefers not to exercise collection and marketing rights, then the initial owner of bull can make arrangements for pick up (and return) of bull for semen collection at a time convenient to the new owner of bull, and when bull is not being used for natural service breeding.

Sale Location

Please see map on Page 6.

Cattle Load Out

Cattle can be loaded out during and after the sale. We ask that any pot-sized loads wait until the conclusion of the sales to load out. We will load out cattle on Saturday and ask that each buyer inform the clerks of your desire to load out on Saturday along with an approximate time of arrival. If you require a load out on another day, please inform the clerks concerning your desired date and time.

Livestock Transportation

Livestock transportation will be available.

Embryo Interest for Females

Each female will sell with 100% ownership and 100% possession rights. However, unless otherwise stated in the catalog, every female will sell with seller retaining the rights to receive one future collection of embryos via IVF protocol or conventional embryo collection methods. Please don't hesitate to visit with Sale Team for any questions related to embryo rights.

Breeding Guarantee on Females

All females are guaranteed to be breeders through their first season. A Female is not guaranteed to be a breeder after the date of the sale when that female is used or attempted to be used in an embryo transfer program, unless by a separate agreement between the buyer and seller. Even though it is possible, some of the females have worked successfully in embryo transfer programs in the past, and should in the future. There is NO guarantee or warranty on future embryo production of any sale female.

Catalog Order

Bulls will not sell in numerical catalog order. A printed sale order will be available prior to the sale. Please ask a member of our sale team for a sale order. If you cannot attend sale and would like a sale order please contact a member of our sale team and we will ensure you receive one.

Sight Unseen Purchases

If you are unable to attend the sale yet have an interest in purchasing from the sale, please give us a call at the listed numbers and we will work with you to take care of your purchasing needs. All discussions will remain confidential. Sight unseen purchases are guaranteed for customer satisfaction.

Welcome to Grassy Lake

We are finally here! Ready to host our Inaugural Bull and Female Sale at Grassy Lake Cattle Company. At least we sure hope so. Please accept our invitation to join all of us at Grassy Lake Sale Headquarters on October 22 and 23. We have made every effort possible to ensure your comfort and convenience while offering an efficient, well run sale, cattle displayed for ease of viewing, and food services to keep one from wanting for anything else.

We have tried to dot all the I's and cross the T's. We were told by several friends in the seedstock business that hosting our ranch sale would be a labor of love because there are about 1000 moving parts and each one must be identified and taken care of. These moving parts include the everyday jobs of running a ranch, building a cutting edge seedstock program, genetic identification, AI, embryo transfer, breeding, calving, cattle care, bull development, making hay, records, maintenance, and the unending lists go on as each of you know. Along with everything normally related to ranching we also decided to tackle a new sale facility, sale display pens, working pens, roads, fencing, and that list goes on as well. Again, your comfort while at Grassy Lake is always at the top of our list.

The Grassy Lake crew has continued to give everything in their tank to ensure the success of our program, the quality of our sale offering, and the comfort for all who attend this first-time event at Grassy Lake. We cannot offer enough thanks and gratitude to Grassy Lake General Manager, Skylar Harris and his wife Michelle; Bull Development Manager, Heston

Massey and his fiancé Olivia; Ranch Equipment Manager and Herdsman, Gavino Vasquez and his wife Taylor; Joshua Thompson; Ranch Hand; and Matt Malouf, Special Projects and Advertising. There is never a day goes by we are not blessed to have this dedicated crew as part of our ranch family!

Grassy Lake Cattle Company is dedicated to raising elite end seedstock Brangus and Ultrablack cattle built on the foundation of cutting edge, economically relevant traits! Our demand for genetic trait excellence starts with designed calving ease and spreads across all platforms to include extra

pounds, optimum total maternal values, best of the breed fertility, and the level of carcass merit that moves the needles for the feeding and harvest side of our industry. We strive to design genetic input for the future of the beef industry rather than the today of the industry.

From the start, Grassy Lake has been focused on producing cattle that covers all the bases ensured in doing so through our extensive research into genomically enhanced genetic predictors (GE-EPD), review of measured performance data, and evaluation of design, eye appeal, and phenotype. Grassy Lake has built a herd with elegant genetics and continues to strengthen the program by purchasing those animals we believe are the best herd sires and donor cows in Brangus. Our commitment to raising the best Brangus cattle in the business is at the root of everything we do, every day at Grassy Lake Cattle Company.

We realize we have been blessed beyond measure and owe everything to our Faith, Family and Friends. We hope you plan to join us on October 22 and 23. Please do not hesitate to contact anyone on our team with any questions you may have about Grassy Lake or the cattle we offer you in our sale.

Safe roads and God Bless,

Randy and Gina Malouf

It's All Important

Every Trait Is Important

We heard a conversation recently between seedstock producers and one stated their program did not place emphasis on carcass merit indicators since their bull buyers rarely asked about those traits. Another chimed in and suggested their prime emphasis was strictly calving ease since their bull buyers seemed to only consider that trait as important, and the conversation went on.

At Grassy Lake you will get the BEST of trait selection across the board as we strongly believe it is our responsibility and dedication to provide all traits important to our industry. Even if a bull buyer may not place emphasis on a given set of traits, somewhere in the scope of our industry those traits become highly important, and in fact, critically important. Calves will be born, cattle will be weaned, feedlots demand efficient and profitable gain, cattle will be sent to harvest, and consumers will ultimately be our judge and jury. At EVERY stage of this chain, those genetics we build in a seedstock program become critical to the next one downstream. Yes, there will be certain traits deemed unimportant to producers, but this doesn't mean those traits are unimportant to our industry.

From fertility, to hoof and leg soundness, udder quality, optimum milk value, libido in the pasture, fleshing ability, temperament, and the list goes on! Somewhere any and all of these traits become important and these are going to also be important at Grassy Lake! Each of these traits are vital to the welfare of the beef industry and we will address at Grassy Lake.

Genomically Enhanced EPD Values

We have embraced DNA technology and its impact in the beef industry from providing accurate ancestry information to utilizing DNA technology in providing Genomically Enhanced EPD Values (GE-EPD). We see an incredible demand for DNA technology starting with the seedstock provider now reaching all the way to the packing side of our industry. It's here, here to stay, and will be instrumental in making more profitable seedstock cattle therefore creating more value for the customers of our genetic program. Closely study genomically enhanced EPD (GE-EPD) ranks, and place high emphasis on this information! Don't hesitate to ask for assistance or recommendations from our team. **BUY THE BULLS THAT FIT YOUR NEEDS and the LONG-TERM GOALS OF YOUR PROGRAMS.** The profit driving information is available. Now trust the process.

As of print time we are awaiting the very latest DNA results to ensure GE-EPD numbers will be provided by sale time. Currently, 88% of the sale cattle are listed with so-noted GE-EPD panels in the proper space in this catalog. By sale week we project 136 of 140 sale cattle will be pedigree verified and have Genomically Enhanced EPD values available.

Our GE-EPD values are impressive with balanced traits and highly desired spread across antagonistic values. Grassy Lake seedstock genetics have a huge bang for your dollar offer the potential of moving your economic needle as few programs can. We simply ask you to review these factual differences compared other seedstock breeding programs available. These are the trait average percentile rank for the ENTIRE 140 head Grassy Lake offering:

H Preg: 15%; Stay: 15%; Breed Back: 10%; Num Calves: 15%; Term Index: 5%
CED: 45%; WW:10%; YW: 10%; M: 65%; TM: 15%; SC: 35%; REA: 10%; IMF: 5%

Fertility Indicator Traits

Without reserve we have an intensive focus on genomic enhanced breeding values for Heifer Pregnancy, Stayability, Breed Back, Number of Calves. These four values are the best fertility indicator traits in our breed's EPD arsenal, and with these values seedstock breeders can be more dedicated and comfortable with selection for fertility, the most economically important trait in the cattle business! Stockbulls purchased by any cow/calf producer using these highly effective and economically driven traits will become the driving force in profitability for any program in the ranching business. These four fertility indicator traits are calculated values from the entire breed's national database and can be used to make genetic improvement in a herd's ability to get pregnant, remain in the herd over a long lifetime, breed back annually, raise more total calves in a cow's lifetime, and therefore wean more total pounds of calf. Fertility is the MOST economically important trait in the cattle business. More total calves and more total pounds equal more total dollars!

The National Cattle Inventory Report

The July 2026 National Cattle Inventory provided an excellent outlook for those in the cow/calf segment of our beef industry. There are 38.1 million total cows and heifers that have calved in the United States which is identical from the 2025 inventory report. The United States calf crop is estimated to be down 2% from last year and cattle on feed as of September 2026 was 1% above 2025 levels for same reporting period! Herd expansion is very slow to recover and economic projections for the cow/calf producer remain highly optimistic for the next several years.

It's All Important

"What's a Good Bull Worth"

From Dr. Mark Johnson, Respected Extension Beef Specialist, Oklahoma State University

Dr. Johnson describes a good bull as one with registration papers, quality pedigree information, genetic values to include genomically enhanced EPDs (GE-EPDs), passed a Breeding Soundness Examination and sells with breeding warranty, and a bull that will add value to calves sired due to genetic merit and said bull(s) fit individual program breeding objectives and marketing plans.

Using market reports released by USDA based on the overall national average for the week ending September 18, 2026 and using Dr. Johnson's formula:

- 550 lb. weaned steer calves are worth about \$426.00/lb. for a value of \$2343/head. If my future marketing plan is to sell weaned steers, $\$2343 \times 5 = \$11,715$ is the answer.
- 750 lb. yearling steers are worth about \$3.48/lb. for a value of about \$2610/head. If my future marketing plan is to sell yearling steers, $\$2610 \times 5 = \$13,050$ is the answer.
- 1500 lb. finished steers are worth \$2.26/lb. for a value of \$3390/head. If my future marketing plan is to retain ownership selling on live weight basis, $\$3390 \times 5 = \$16,950$ is the answer.

So, in this current market a good bull is worth somewhere between \$12,000 and \$17,000 to a commercial cow/calf operation. One key point illustrated here is that the longer you own the offspring before marketing, the greater the value of the bull to your operation.

A Few Quick Points

*Our sale bulls have been raised in a belly deep forage environment, tested from weaning to yearling time on haylage or silage, and continued their post yearling development period to sale time on silage and grazing forage.

*Every bull in the sale offering has passed a strict BSE that included a reproductive physical evaluation and extension, an actual semen sample collection, and evaluation for motility and morphology of sample. The Fall Yearlings were sampled the same as the Coming Twos and the Two-Year Olds.

*Percentile Ranks associated with GE-EPD values are the most important component of the database in this catalog. Trust these values as they offer the best comparison when ranking genetic value for individual animals across the entire Brangus breed! These genetic ranks, and their associated GE-EPD values, are more accurate and reliable due to their enhancement using known DNA genetic markers.

*Considering Calving Ease Direct 42% of the cattle in this sale rank in the best 35% for the entire national Brangus population, 57% of the sale cattle have an actual birthweight of 75 lbs. or less, and over 71% have an actual birthweight of 79 lbs. or less.

*Our industry sells cattle by the pound and these pounds are valuable! The entire offering in this sale has an average GE-EPD rank in the TOP 10% for Weaning Weight and Yearling Weight GE-EPDs when compared against the national Brangus genetic population.

*Additionally, the packers pay for pounds of high-quality protein and these sale cattle rank against the national breed population in the TOP 10% for Ribeye Area and the TOP 5% for IMF (Marbling Indicator) GE-EPD values!

*Studies have shown fertility IS the most economically important trait in the cattle industry and NINE times more important than any other trait. You will find our Fertility Indicator Values for all sale cattle are outstanding and when compared on average to the entire Brangus population rank in the TOP 15%, or higher, for Heifer Pregnancy, Stayability, Breed Back value, and Number of Calves produced!

*Those blessings of fertility, calving ease, soundness, udder quality, calf raising value, keeping ability, and temperament are the long-term genetic bonuses from our stock bulls! The entire sale offering ranks in the TOP 15% on average for Total Maternal Value!

*Keep in mind these impressive GE-EPD values for Calving Ease, Weaning Weight, Yearling Weight, Ribeye Area, and IMF are antagonistic traits to the just above noted Fertility and Maternal Values! Our program accomplishes more than can be described by blending antagonistic traits together at such an impressive level.

Embryo Collection Rights

Rather than trying to keep track of different ownership percentages thru our females we have decided to sell 100% ownership and possession of every female selling. However, Grass Lake Cattle Company, and Cooperators, will reserve the rights to one embryo collection or two half collections (IVF harvest or conventional collection) on every female in the sale at our expense and your convenient timing. Please note for Lot 110 we will reserve the rights to two embryo collections with a minimum of 10 transfer quality embryos per collection.

STEAK YOUR FUTURE ON BRANGUS

The Brangus Value project is a comprehensive progeny test overseen by International Brangus Breeders Association designed to follow Brangus and Ultrablack AI sired steers through the feeding and packing segments of our industry while capturing data on feed efficiency, carcass traits, and tenderness. It is the objective of our International Brangus Breeders Association to objectively determine exactly how our genetics will compete in the feeding and packing segments of our industry.

Each set of Brangus and Ultrablack steers is control tested against Angus genetics previously well documented for their ability to feed, hang, and return high end dollar values. What we know so far is that our breed sired cattle can compete, will compete, in the yard, on the rail, and do so with fewer pen pulls, death losses resulting in our cattle returning more dollars in a competitive feeding world in south central Kansas.

**We already know you love Brangus cattle.
Help our breed move to the next level**

Genetic Condition

Genomically Enhanced

Date of Birth

Prefix

**Fertility Indicators/
Terminal Index**

**National EPD
Percentile Rank**

Registration Number: Animals noted with “R” number are Registered Brangus. Those noted with a “UB” number are Ultra-Blacks, indicating they are a Brangus-Angus blend. Those noted as UB2 are second cross Ultrablacks. “AX” or “UX” recorded animals are appendix recorded cattle that have non-typical Brangus color pattern. Animals noted with “DNA” are correctly pedigreed yet waiting final validation for AI sire or possibly Donor Dams. These animals will ultimately have “R” or “UB” prefixes.

Polled/Scurred/Horned: Denotes animals that are either smooth polled or have the presence of scurs or slick spots. Those noted as “scurs” typically have had scurs removed post-weaning.

Individual Performance

Birth Weight (BW): Actual weight at birth, expressed in pounds.

Scrotal Circumference (SC): Testicular circumference, measured in centimeters, and adjusted to 365 days of age.

New EPDs/Index

Heifer Pregnancy (HP): The probability that a female will have a calf as a two year old. Expressed as a percent with the higher number more desirable.

Stayability (Stay): Measures the probability that a cow will still be in the herd at six years of age, with the higher number being more desirable.

Breed Back (BB): A fertility indicator trait that expresses the likelihood for a female ability to become pregnant on an annual basis, or a sire’s ability to produce daughters with the same value.

Number of Calves (NC): A fertility indicator trait that expresses the number of potential calves a female will have in her lifetime, or a sire’s ability to produce daughters with a greater likelihood to have more calves in her lifetime.

Terminal Index (Term): Evaluates a sire for use on mature cows with all offspring put on feed and sold in a terminal end point scenario. No replacement females are kept in the scenario.

Expected Progeny Difference

Expected Progeny Difference (EPD): The genetic predictor of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the breed database.

EPD Accuracy: Since all sale animals in this catalog are non-parents, their accuracies are the lowest calculated by our national sire evaluation program. Every EPD reported is either current, interim or pedigree EPD.

Calving Ease Direct (CED): is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight (BW): Expressed in pounds, is a predictor of an animal’s ability to transmit birth weight to progeny compared to that of other animals.

Weaning Weight EPD (WW): Expressed in pounds, is a predictor of an animal’s ability to transmit weaning growth to its progeny.

Yearling Weight EPD (YW): Expressed in pounds, is a predictor of an animal’s ability to transmit yearling growth to its progeny.

Milk EPD (Milk): Predicts an animal’s genetic merit for milk and mothering ability as expressed in daughters compared to daughters of other animals. In other words, it is that part of a calf’s weaning weight attributed to milk.

Total Maternal EPD (TM): Expressed in pounds, a genetic predictor of weaning weight by blending maternal milk and weaning weight value.

Scrotal Circumference EPD (SC): Measured in centimeters at yearling time, predicts testicular size.

Ribeye Area (REA): Expressed in square inches, is a predictor of transmitting ribeye size and overall muscle which is a key component in USDA yield grades.

Intramuscular Fat (IMF): Expressed as a percentage, is a predictor of transmitting ability for marbling or intra-muscular fat correlating to USDA quality grade at harvest time.

Percentile Ranks: The given EPD values are current to the printing of this catalog. However, an EPD is meaningless without the knowledge of where that given EPD ranks in a breed population. The PERCENTILE RANKS are offered in combination with the EPD or Index values and determine where EPD ranks in the national Brangus database from our National Genetic Evaluation. A percentile rank of 10% indicates a trait in the Top 10% of the entire nations Brangus database.

Potential Genetic Conditions

Genetic Conditions: If a genetic condition is known to exist in any sale animal or the potential of a genetic condition exists, we will make note of this in the information line for that animal. All animals in the sale have been tested, are pedigree free of any known conditions or will be noted as a potential carrier while waiting for final testing.

Genomically Enhanced EPD Values

GE-EPD Values: Genomically enhanced Expected Progeny Differences (GE-EPDs) are a more accurate prediction of an animal’s genetic merit, combining traditional EPD calculations with molecular genetic data from DNA testing. By analyzing an animal’s DNA and comparing it against a reference population, GE-EPDs provide higher accuracy, especially for young, non-parent animals, allowing producers to make more informed decisions to accelerate genetic progress in their herds.

Where's The Beef?

- This big ribbed, thick ended, big-topped prospect deserves attention if your program is serious about raising stock bulls intended to move the needle in our beef industry and should be an attraction due to his super pedigree, look, and GE-EPDs.
- Note his superior blend of elite end genomic predictors for Calving Ease, Fertility, Carcass Merit, Milk, all coupled with herd moving growth.
- His natural dam was the "pick" of all heifers born in 2019 at Blackwater Cattle Company and is now a featured donor at Mound Creek.
- She's earned TEN TRAITS in the TOP 10% and TWELVE in the TOP 25%.
- His sire is rapidly making his mark in the breed after giving us the Mound Creek "keeper" MC Big Bopper 924L25, \$140,000 MC Fonzie 468M12, \$70,000 BWR Armstrong 948N10, \$40,000 BWR Ms Powerball 468M8, and the list goes on!

Royal Family Heritage

- Long in every measure from the great dam, MC Ms Resource 777A!
- She's royalty at Mound Creek Ranch and is responsible for the prolific 777 cow family due to her super fertility, impressive carcass predictors, elite levels of extra pounds, ideal scrotal genomics, and above average CED.
- His sire, BWCC Buck Shot 62F22, traces to an incredible cow that was an original member of our "Desert Cow" Program weaning her last calf at 19 years of age doing so with a perfect udder and a perfect hoof.

Selling: 100% possession and two-thirds breeding/semen interests. Grassy Lake will retain one-third breeding/semen interests.

- Super Duty is another elite herd sire prospect, will contend for high honors, and on the short list for our "keeper" bull this year.
- He's bulky, big bodied, attractive, plenty of bone, and easy tempered.
- Impressive GE-EPD values that offer calving ease, elite pounds, ideal maternal value, extra carcass potential, and excellent fertility EPDs.
- His sire, Sho Me The Money, has an incredible set of sons and daughters in this sale justifying his \$300,000 value in this program.
- His prolific dam has 11 offspring selling by 4 distinctly different sires!
- His prolific dam has an outstanding set of 11 sons and daughters in our sale featuring several herd sire prospects (like Lots 55 and 56) as well as donor quality daughters.

- Sierra is an ET brother to Super Duty and will contend for "keeper" honors.
- Sierra is the more elegant version of these two brothers and makes this choice as difficult as any pair of brothers in our sale.
- Their donor dam is a prolific embryo producer and is sired by the \$100,000 BWCC Papillon 458G, considered one of the two best sons of the highly regarded BWCC McQueen 192E24.
- The dam of these two bulls is a daughter of the famous 10G17 who was mentioned in Lot 28 producing that big ended, heavy bodied herd sire prospect selling from Mound Creek.
- Sierra is an exciting herd sire prospect with a light birth weight and best 20% CED to justify his use on heifers, and blends elite growth and carcass with excellent fertility.

Elite Pedigree, Elite Numbers

- Big fan of this herd sire prospect due to his elite GE-EPDs and pedigree!
- He is definitely “keeper” quality, but we have so much influence of the great MC Ms Resource 541A4 thru Five Star, Santiago, and 541J6 that putting him into heavy use becomes a more problematic concern.
- The 541A4 donor will go down in breed history as one of the all-time great cows and is the only current living member of the “thin air club” of females that have joined the \$1,000,000 earning club!

541A4

Elite Pedigree and Phenotype

- We absolutely love this wide bodied, deep sided, easy tempered prospect, but as noted in the previous lot, we find our ability to heavily use him limited.
- Our \$140,000 selection of Fonzie gave us a Powerball son, 541J6 produced the \$85,000 Ronald Reagan, and 541J6 is a direct daughter of the famous MC Ms Resource 541A4 so our loss is your gain.
- He offers THIRTEEN TRAITS in the TOP 20% of the breed highlighted by outstanding fertility indicators, elite carcass prospects, and added Milk.

Cool Looks, Great Numbers

- We predict Cruise Control will be competing for honors.
- He's very long, super deep sided, extra wide bodied, square made, clean and neatly designed, and just overall cool looking prospect.
- His dam has earned favored status as a donor and is a full sister to Sho Boat, Sho Time, and Sho Nuff producing young donor dams 313K2 and 313K11, herd sire prospect Lot 80, and now exciting Lot 59!
- He is brother to \$140,000 Fonzie, Mound Creek "keeper" Big Bopper, and \$70,000 Armstrong.

New Family Tribe

- Laramie is from an emerging new family starting with an Ellingson Angus cow whose first calf was MC Ms Boulder 896H. Note the red carpet Black Pearl, Lot 134.
- 896H produced 12 lots sold at Mound Creek last March averaging \$17,583!
- We really like these three sons of 896H and know Laramie will be well received due to his easy nature, impressively long rib, big top, ample rib, and bone.
- These Hammer Time's are outstanding and compete with the Sho Me The Money's for "best sire group".
- Note his TEN TRAITS in the TOP 25% and better!

Neat Pattern, Great GE-EPDs

- Featured in our advertising due to his striking good looks, extra pounds gained along the way, and elite GE-EPDs.
- His donor dam is a herd favorite and an ET sister to Sho Boat, Sho Time, Sho Nuff, and the donors at GLCC we refer to as the "313 sisters".
- BWCC Ms Wide Center 313H32 has three impressive sons selling here including herd sire prospect Cruise Control selling as Lot 59.
- ELEVEN TRAITS in the TOP 15% coupling extra pounds with elite carcass and super fertility indicators!

- Obviously, we know this bred heifer is amazing and honored to call her Dolly Parton, the spectacular and worldwide recognized entertainer.
- Our Dolly Parton is special as well, bred to calve at 23 months of age, and still gave us a set of IVF embryos produced early this year.
- She is triple bred to the outstanding 889 family, sired by the \$300,000 Sho Me The Money, and out of the \$100,000 MC Ms Ignite 889K41.
- Our 889K41 donor is a balanced trait specialist and the most attractive of all cows in our pastures. She highlights superior milk value, carcass merit predictors, ample growth and calving ease, with superior traits that indicate fertility.
- Dolly has outstanding GE-EPDs following the path of her great donor.
- Her picture fails to do her justice, and all will love her incredible length of body, wide top, beautiful front end, square corners, and breathtaking genomic profile!

BWR MS JOLENE 313N4 ET

- Jolene, Jolene, Jolene, Jolene, your beauty is beyond compare!
- Without question the Money daughters in our sale are incredible!
- Money set the Brangus sale record at \$300,000 in 2024 at Mound Creek!
- Study these Money sons and daughters and the "why" becomes crystal clear that buying Money has been well justified!
- We firmly believe this stout bred heifer has donor cow stamped all over and her pedigree, phenotype, genetic predictors, and breeding status justify our belief.
- Jolene is simply spectacular, and obviously one of the greatest songs in Dolly Parton's illustrious career.
- She is due to calve about 23 months of age and could be bred to the \$59,000 G+ Astonish 70N2 (and yes Cody, I sure hope so)!
- Her young donor dam is a direct daughter of the cow we believe is the best McQueen daughter ever produced.

from Grassy Lake Cattle Company

- After a slow start from a poor recip Ms Prada has turned the jets on and represents so many of the super traits we love about our Money's.
- She has a striking design, big hip, cool looks, and she just convinces us there are great herd sires to be produced in her future.
- Ms Prada was a featured heifer in our ad campaign and brings to the genetic table, donor dam BWCC Ms Wide Center 313H26.
- From a 20% CED Ms Prada offers elite 1% growth for WW and YW; super carcass at 1% REA, 4% IMF; and a great set of fertility genomics.

- The most deceiving heifer in the sale and one that has to be seen and studied to be truly appreciated. Celebrity is big ended, wide bodied and a real looker.
- Her dam, GL Ms Five Star 313K11, is rapidly proving her genetic worth contributing TEN TRAITS in the TOP 10%, TWELVE TRAITS in the TOP 20%, and produced the stout made Lot 103, GL A Plus 313M26.
- Note 313K11 posted a 111% Yearling Weight Ratio, 106% REA ratio, and 119% IMF ratio backing up lofty GE-EPD rankings against the breed's entire population.
- These females sired by Sho Me The Money have certainly justified to us, his \$300,000 value!

Terms & Conditions

Except for those stated in the below terms and conditions, there are no warranties, either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees set forth in the "Terms & Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

1. BIDDING: Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes as to bids, and his decision shall be final.

2. TERMS: All terms are cash or check. Settlement must be made to the clerk at the conclusion of the auction.

3. PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold, but will not be delivered until settlement has been made.

4. CERTIFICATE OF REGISTRY: When full settlement has been made, a certificate of registration will be furnished and transferred to the purchaser on those lots that are registered. Give full name and address to the clerk when making payment so the Certificate of Registry will be transferred properly.

5. HEALTH: All animals where possession is sold are eligible for interstate shipment except as otherwise noted. The cattle have been tested for Tuberculosis and Bangs disease within thirty (30) days of the sale date or come from a Brucellosis Certified Free Herd or come from a Brucelosis Certified Free Herd or originate from a Certified Tuberculosis or Bangs free state.. A health certificate will be furnished.

6. ANNOUNCEMENTS: Announcements from the auction box will take precedence over the printed matter in this catalog. All cattle will be sold by lot numbers as announced by the auctioneer.

7. BREEDING GUARANTEE: (A) All animals are guaranteed to be breeders with the exception of (1) injury or disease occurring after sale; (2) negligence or willful misconduct on the part of the purchaser. (B) Any bull which either (1) produces viable semen; (2) settles 1/3 or more of the healthy cows he serves; (3) is the sire of 20 or more animals or; (4) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month trial period, shall be considered a breeder.

7. DONORS: (A) A Female is **NOT** guaranteed to be a breeder after the date of the sale when that female is used or attempted to be used in an embryo transfer program, unless by a separate agreement between the buyer and seller. (B) Even though it is possible some of the females have worked successfully in embryo transfer programs in the past, and should in the future, there is **NO** guarantee of warranty on future embryo production of any sale female.

8. LIABILITIES: All persons who attend the sale do so at their own risk. Cattle Brokers, Inc. has been employed by the consignor(s) of the animals being sold solely for the purpose of advertising and conducting the subject sale. All information regarding the subject animals as published in sales brochures and as announced at the sale is based on the representations made to Cattle Brokers, Inc. by the consignor(s). Cattle Brokers, Inc. has not made any independent investigation to verify and Cattle Brokers, Inc. assumes no liability, either legal or equitable, for failure of title, health registration and lien status of the subject animals; and Cattle Brokers, Inc. makes no representations, either expressed or implied, as to whether or not the subject animals are security under any lien, either legal or equitable.

9. PRIVATE BIDS: Phone bids may be furnished in confidential form to Cattle Brokers, Inc. at (979) 255-4357.

10. OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT: (A) All claims for adjustment must be made in writing within **six (6) months** of the sale date. (B) Any animal that has not proven itself a breeder within the time limits specified above, if in healthy condition, may be returned to seller at buyer's expense. The seller reserves the right and privilege of trying for a period of six (6) months to prove the animal a breeder. If proven a breeder, the animal will be returned at buyer's expense. Should the animal fail to breed, the seller will provide a replacement of the animal with another of equal or greater quality. If a replacement animal is not available when needed, a credit will be issued toward your next purchase. (C) Any animal returned must have a veterinarian's certificate that it is healthy and free of Bangs and Tuberculosis. (D) **Seller does not guarantee death loss or injury.**
